Experience

TECHNICAL PRODUCT MANAGER, MOBIFY – 2014-PRESENT

I work at Mobify, where I create product concepts, lead product teams and try to work out what's happening next. My latest project has been in partnership with Google to bring app-like technologies such mobile payments and push notifications to the web.

PRODUCT MANAGER, MEDEO – 2012-2014

Medeo, short for "medical video", let's people in healthcare see their patients online. I was the first employee and helped see the company through its acquisition in 2014. Also, people love using Medeo.

Projects

LEAD EDUCATOR – 2016

I teach the Product Management course at BrainStation, a startup bootcamp school. I've even helped a few students get their first job as a junior product manager. I love teaching!

STACKER – 2014

Stacker helps kickstart the development of iPhone apps. I recently released Stacker as an open source project. A few apps have already been released that were built with Stacker.

WEBVIEWJAVASCRIPTBRIDGE – 2014

WebViewJavascriptBridge is an open source project for sending messages between native and web code. The project is used in a number of apps including Facebook Messenger. I'm the second largest contributor and try to help maintain the project in my spare time.

SKYPAY – 2012

SkyPay strives to be the simplest way to sell online. I started SkyPay to help other entrepreneurs make money selling their creations to their fans.

Education

University of British Columbia - Combined Major in Business & Computer Science, Graduated with Honours - 2012

Press & Speaking

PhoneGap Day, Jan 2016 - Speaking at Adobe's offices about building apps.
Vancity Buzz, Dec 2015 - Interviewed about starting a career in Product Management.
Sauder School of Business, Jan 2014 - Recognized on their website for my work at Medeo.
