Experience

PRODUCT MANAGER, MOBIFY – 2014-PRESENT

I was hired by Mobify to help build and launch a new product for their mobile shopping platform. Launched in the summer of 2015, Mobify's App Experience Framework already powers a number of retailers' apps, including Beyond The Rack and ThinkGeek.

PRODUCT MANAGER, MEDEO – 2012-2014

Medeo, short for "medical video", let's people in healthcare see their patients online. I was the first employee and helped see the company through its acquisition in 2014. Also, people love using Medeo.

Projects

PRODUCT MANAGEMENT COURSE – 2016

Teaching the Product Management course at Brainstation, Canada's largest and fastest growing code school.

STACKER – 2014

Stacker helps kickstart the development of iPhone apps. I recently released Stacker as an open source project. A few apps have already been released that were built with Stacker.

WEBVIEWJAVASCRIPTBRIDGE – 2014

WebViewJavascriptBridge is an open source project for sending messages between native and web code. The project is used in a number of apps including Facebook Messenger. I'm the second largest contributor and help maintain the project.

SKYPAY – 2012

SkyPay strives to be the simplest way to sell online. I started SkyPay to help other entrepreneurs make money selling their creations to their fans.

Education

University of British Columbia - Combined Major in Business & Computer Science, Graduated with Honours - 2012

Press & Speaking

PhoneGap Day, Jan 2016 - Speaking at Adobe's offices about building apps.
Vancity Buzz, Dec 2015 - Interviewed about starting a career in Product Management.
Sauder School of Business, Jan 2014 - Recognized on their website for my work at Medeo.
